

Rent-a-Car
Manual Testing - Adding a New Customer and Vehicle
G8

The following is a step-by-step procedure to add a customer to Rent-a-Car's internal customer storage:

Step 1: Start Rent-a-Car and welcome screen will appear.

Step 2: Click "Customer Data" on the top menu bar and the menu will appear.

Step 3: Click the "Add customer..." menu item and the "New Customer" dialog box will appear.

Step 4: Fill in the fields with the following information:

Last Name: Test

First Name: Test

Phone Number: (555) 555-5555

Email Address: test@testing.com

Age: 30

ID Number: 1

Step 5: Click "OK" and either nothing will appear or an error dialog box will appear.

Step 5.1: If an error dialog box appeared, click "OK" and the "New Customer" dialog box will appear again.

Step 5.2: Perform step four and step five again, then continue to step six.

Step 6: Open the file viewer on your system and the application will open.

Step 7: Navigate to where Rent-a-Car is saved and the main folder will have the text file called "CustomerBase".

Step 8: Open the "CustomerBase" text file and text will display.

Step 9: Verify the entered information is displayed in the text file.

The following is a step-by-step procedure to add a vehicle to Rent-a-Car's internal vehicle inventory:

Step 1: Start Rent-a-Car and welcome screen will appear.

Step 2: Click "Inventory" on the top menu bar and the menu will appear.

Step 3: Click the "Add inventory..." menu item and the "New Vehicle" dialog box will appear.

Step 4: Fill in the fields with the following information:

ID Number: 1

Make: Ford

Model: F150

Color: White

Year: 2016

Class: Truck

Daily Price: 41.62

Step 5: Click "OK" and either nothing will appear or an error dialog box will appear.

Step 5.1: If an error dialog box appeared, click "OK" and the "New Vehicle" dialog box will appear again.

Step 5.2: Perform step four and step five again, then continue to step six.

Step 6: Open the file viewer on your system and the application will open.

Step 7: Navigate to where Rent-a-Car is saved and the main folder will have the text file called "CarBase".

Step 8: Open the "CarBase" text file and text will display.

Step 9: Verify the entered information is displayed in the text file.
