

Acceptance Tests:

Vehicle Inventory Search and Customer Information Search

Vehicle Inventory Search:

- Given: Store Clerk is on SearchCustomerUI page
- When: the clerk enters in a First Name and a Last Name
- Then: the scroll pane will display the associated information
 - If: the searched customer doesn't exist, display "Customer Not Found"
 - If: the searched customer does exist, display their first/last name, their phone number, their email, their age, and any vehicle they have rented.

Customer Information Search:

- Given: Store Clerk is on SearchInventoryUI page
- When: the clerk clicks the dropdown
- Then: the clerk may select their search type (ID, make, model, year color, class)
- When: the clerk types a search query into the text box and hits search
- Then: any matching car's information will be displayed (ID, make, model, year, color, class)
 - If the search doesn't find any results, display "No matching car found"
