Acceptance Tests:

User Stories 5 and 6

Update damage/mileage/gas upon car return:

- Given: Store Clerk is on ReturnVehicleUI page
- When: the clerk fills in all of the appropriate fields and presses "ok"
- Then: A dialog will appear stating an error or a confirmation
    - If: If an error has occurred, the clerk will be prompted with the appropriate actions to take to correct this error and will be returned to the UI page
    - If: the confirmation is displayed the rentalBase will be updated to remove the rental, the carBase will be updated with new damage/mileage/gas, and the availability of the car will be changed to true

Alter damage/mileage/gas upon car return:

- Given: Store Clerk is on UpdateInventoryUI page
- When: the clerk searches a car by ID
- Then: the searched car's information will populate all of the text fields
- When: the clerk modifies any of the populated fields and clicks "ok"
- Then: the changes will be applied and the carBase will be updated
